

Regolamento REACH sulle sostanze chimiche

Regolamento (CE) n. 1907/2006, denominato regolamento "REACH" ("Registration, Evaluation, Authorisation of Chemicals") concernente la registrazione, valutazione, autorizzazione e restrizione delle sostanze chimiche.

Il Regolamento REACH richiede che vengano comunicate sufficienti informazioni sulle Sostanze Estremamente Preoccupanti (SVHC, "Substances of Very High Concern") contenute nei prodotti in concentrazioni superiori allo 0,1% in peso (p/p), al fine di consentire un uso sicuro dei prodotti.

Le informazioni seguenti riguardano 247 Sostanze Estremamente Preoccupanti (SVHC) aggiornate dall'ECHA il 21 gennaio 2025 (<http://echa.europa.eu/candidate-list-table>).

I prodotti Brother elencati nella tabella contengono SVHC in concentrazioni superiori allo 0,1% in peso (p/p). Informazioni dettagliate sono disponibili nel database SCIP dell'ECHA. (<https://echa.europa.eu/scip-database>)

Le istruzioni su come utilizzare il database SCIP si trovano alla pagina "Help", alla quale si accede cliccando sull'icona.

Il database SCIP può essere consultato utilizzando l'“Identificativo articolo” oppure il “Nome generale del prodotto” indicati nella tabella. Se lo stesso prodotto è presente in più righe, selezionare il modello che si riferisce all’area geografica dalla quale è stato acquistato il prodotto.
